ABOUT

JHAY

AVIS

Jhay Davis

Over the years, I have led enterprise level efforts that encompass a complete spectrum that ranges from Consumer/Product Research, Technical Software Solution Design, to Product branding and Marketing Strategy.

I have an educational background and leadership experience in Software Engineering, Marketing, and Interaction Design

My 15 years of enterprise-level strategic leadership experience includes creating high performance enterprise level digital strategies for: Marketing/Sponsorships, Search Engine Optimization (SEO), Event Marketing and integrated digital Experience Design. I have provided creative direction over native mobile app development and executive leadership over interaction design for technical product engineering.

What follow are examples from my portfolio of “hands on efforts” that give me a practical perspective of process needed for both creative development and technical solution design. You will see work that includes **Interactive Design, Mobile App Development, Motion Graphics Design, and Experience Design.**

Car Enthusiast Art: eCommerce Website

This is a dynamic database driven website that allows customer to review art, add to a cart, and track the total cost of items to purchase. It also includes an Administration UI to add and remove products to the store. [Try it here!](#)

The screenshot shows the 'Car Enthusiast Art' website. The header features the site name, navigation links (Home, Shop, About, Cart, Contact), and a search bar. The main content area is titled 'Product Detail' and displays a digital artwork of a white Porsche 718 Spyder. Below the image, the product name '718 Spyder' is shown, along with its format 'Digital', price '\$199.00', and stock status 'Number in Stock: 100'. There is an 'Order Qty:' field with a dropdown set to '1' and an 'Add to Cart' button. A 'Back to Store' button is located at the bottom of the product detail section.

The screenshot shows a grid of art products under the heading 'View Art By:'. The grid is organized into two rows of three items each. Each item card includes a thumbnail image, the product name, format, price, and a 'Details' button.

Product Name	Format	Price
Carrera 911S	Digital	\$400
Carrera T	Painting	\$600
Cayman 718	Painting	\$500
Macan GTS	Digital	\$300
Boxster GTS	Digital	\$200
911 Turbo S	Print	\$299

INTERACTIVE

EUROSTILE THE SPACE AGE Typeface

Eurostile was developed during an era when the United States and Russia were in a race to put a man on the moon.

Let's explore the origins of Eurostile, the designer behind it and the historical backdrop that framed its use during the Space Age and beyond

NEXT

Highly Animated Website: A Typeface History

This site was intended to push the boundaries of HTML5 and its animation capabilities. The goal was to tell the story of the Eurostile type face in an engaging way while maintaining compatibility across desktop and mobile devices. [Try it here!](#)

EUROSTILE

THE SPACE AGE Typeface

1962

Eurostile is Aldo's most well known typeface and is an evolution of the Microgramma family. The characteristic rounded square forms, similar to TV screens of the time, represented a futuristic feel associated with the space era and was featured in Sci-Fi films such as 2001: A Space Odyssey

1969

USA achieves the Apollo 11 Moon landing. Space Race ends - for the moment.

2016

Eurostile Next developed by Akira Kobayashi at Linotype Design Studio. Race to land a human on Mars is underway

Mars 2040

EUROSTILE

THE SPACE AGE Typeface

TODAY

Eurostile is widely used in TV, movies, and video games such as Homeworld, Ridge Racer, Tom Clancy's Ghost Recon, Tekken, Splinter Cell, Driv3r, Elite Dangerous, and the Starcraft series.

Brand Use

Eurostile is a corporate branding font for Toshiba, Dimension Films, and Diadora. The retail version was authorized by Toshiba Europe GmbH to URW, where Eurostile Black OT was sold. (14) Eurostile Extended Bold is used in the Nokia, New Flyer, Casio and Roland Corporation JUNO logos.

Experience Design: Balance Life App

The purpose of this project was to develop an app that teaches moving meditations similar to Tai Chi to help enhance life balance. The Experience Design included surveys, interviews, persona development, paper prototype testing, high fidelity testing and currently web app in beta development. [Try the Beta Web App Proto-](#)

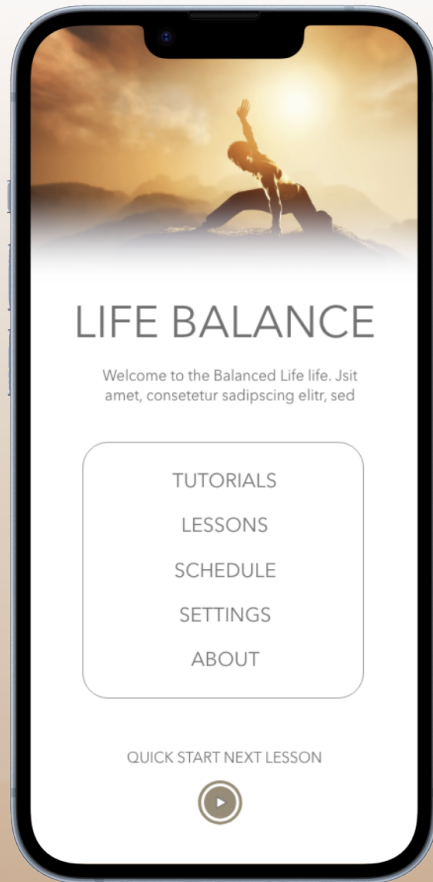

Proof of Concept

1

User wants to begin her first work out. She taps the Quick Start button.

Testing Observations

Every tester hesitated between selecting the "Tutorials" link before clicking "Quick Start"

DEVELOPMENT TOOLS:

- PHP
- HTML
- Adobe XD
- Xcode
- Swift UI
- Adobe Illustrator
- Autodesk Sketchbook

Experience Design: Balance Life App

Multiple iterations of hand sketches, paper prototyping, surveys, and persona development were part of the comprehensive research, testing and design process.

Personas

Damaris - The Analyzer

Age: 43

Status: Married

Location: Suburbs

Occupation: Analyst

Interest: Church, Cooking, Pilates, and Reading

About

Damaris loves spending time with her 3 kids. She's the "Go To" analyst at work and is respected by her peers and managers. However, the demands of her family and her job have now placed a strain on her quiet time. She has noticed she becomes easily frustrated at work and home.

Needs

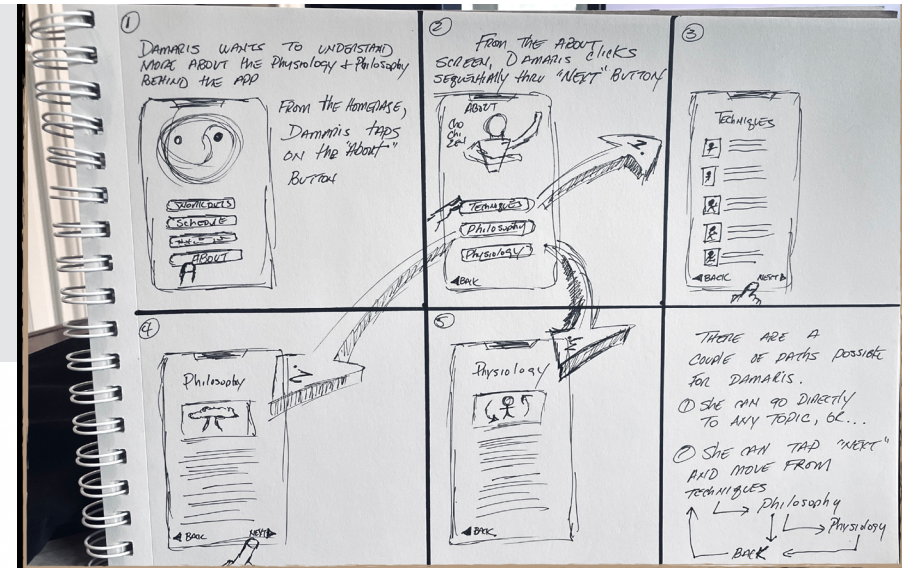

Damaris needs a way to make the most of the quiet moments she has at the end of the day once the kids are in bed. She loves reading but finds she needs something more. Going to a gym is not an option and she doesn't have any space at home for exercise equipment.

Frustrations

Damaris is frustrated because even though she's a dedicated mom and wife, she can't find time for some self-care. The self-help books are great but she needs a more active way to take words from the page and integrate them into her life.

★ Key Feature Recommendation

Because Damaris is an avid reader she wants to make sure that the physical aspects of the app are supported by content she can read in her down time. She believes it is important for her understand the philosophy and physical aspects of why she is doing the exercises in order to fully realize with the benefits.

MOTION GRAPHICS DESIGN

MOTION GRAPHICS

There are four key projects that I will highlight. Each combine sound and music composition, story script, editing and visual effects as part of a complete storytelling effort. Links to videos:
